

1. Create or edit the NetworkManager configuration file:
`sudo nano /etc/NetworkManager/conf.d/disable-wifi-powersave.conf`
2. Change the wifi.powersave value to 2:
[connection]
wifi.powersave = 2
3. Save the file (Ctrl + O, Enter) and exit (Ctrl + X)
4. Restart NetworkManager:
`sudo systemctl restart NetworkManager`
